Staff are aware that children can be at risk of harm inside and outside of the school, at home or in a community setting and that children can be affected by seeing, hearing or experiencing the effects of abuse.

Parental behaviour may also indicate concern; staff will be alert to parent-child interactions or concerning parental behaviour.

8. Children Who May Be More Vulnerable

Some children face additional safeguarding challenges, both online and offline, and understand that further barriers may exist when determining abuse, neglect or exploitation for these children.

This includes:

- Children with a social worker.
- Children subject to Child in Need plans.

an in-year transfer or within the first 5 days of the start of a new term to allow the new school or college to have support in place for when the child arrives.

In addition, the DSL will consider sharing appropriate information in advance of a child leaving particularly if the information would support an assessment of risk to others as well as the pupil concerned.

Where such information has been shared with the DSL in advance of a pupil arriving at the academy the DSL will assess the risk and determine whether support plan or risk assessment is required when the pupil arrives at the academy.

Fear of sharing information must never prevent professionals acting to protect a child.
